

RESPONSE TO OFFICE ACTION DATED: 12/23/2003

Patent Application #: 09/630,720  
Filing Date: 08/02/2000  
Name Of Inventor: Tayo Akadiri  
Title of Invention: "Content Distribution and Method Using a Proxy" (continuation in part of  
"Content Distribution System and Method" patent application)

Group/Art Unit: 3621  
Examiner: Firmin Backer

REMARKS:

The applicant's pending claims are distinguishable from reference patent 6,389,462 for a variety of reasons:  
The reference patent is merely a method for transparently directing requests for web objects to proxy  
caches. The reference patent **does not** claim or suggest the invention of a "Vacancy" unit. The applicants  
claims for the auctioning/trading of said Vacancies (opportunities) by keywords etc, for advertising  
placement etc., - **which is central to the applicant's patent** - is also **not referenced or suggested** by US  
Patent No. 6,389,462
